CUSHIONS FOR PINS.

FOUR PRETTY MODELS DESCRIBED. DIRECTIONS FOR MAKING THEM.

The Diamond, Heart, Star and Panny C 17 4 Cushippa; These May Be Finished to Carry In the Pocket or Hang on the Dressex Materials Required.

To make the diamond cushion cut two pieces of cardboard in the shape of a diamond. The length from point to point, endways, should be three inches. Cover these neatly with silk or satin, in two contrasting colors, say gold one side and brown the other, or black and pink look very well. The two sides must be scamel together. The heart shaped cushion is made in

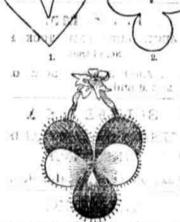

exactly the same manner as the dia-

DIAMOND, HEART AND STAR CUSHIONS. mond, two pieces being cut out in cardboard, covered with silk and seamed to-

The star cushion requires more work than one would imagine at the first glance, though on a closer inspection you will observe it consists of no less than 12 pieces of diamond shaped card, each covered separately with silk. You will require two colors for this-two shades of pink are very pretty or two shades of blue. The diamonds must be cut an inch and a half long, and six pieces must be seamed together to form the front and the same number for the back. A small piece of wadding in the center of the two must be added just to give a little fullness to the middle before they are finally sewed together. When it is designed to carry either of these cushions in the pocket, the ribbon loops and bows may be omitted. The most effective way of carrying

out the pansy design lies in as near a copy of the pansy itself as possible. Two differently shaped pieces are required for it. Cut out diagram marked 1 in cardboard, and cover on both sides with purple yelvet, seaming your edges neat-ly and finishing it off well, this piece being the back. Now you cover diagram 2 with yellow silk. This is the top piece with the three petals, and with ome purple fileselle you must shade the lowest of the targe potals so thickly as

DIAGRAMS AND PINCUSUION COMPLETED. to make it almost appear purple, and the two other petals are to be only slightly shaded with long stitches in the same manner.

Lay diagram 2 on the top of diagram 1, sew them both firmly together and buttonhole stitch them right through with purple silk. This makes a charming pincushion, and if carried out in a large size-that is to say, about six inches-it is a pleasing cushion to hang at one side of the mirror in the bed-ALICH VARNUM.

Strawberry Shortcake. One quart of flour, a cup of butter, 3 teaspoonfuls of baking powder, half a saltspronful of salt, the white of an egg. Rub the butter into the flour, then add the baking powder and salt. Beat the white of the egg to a stiff froth and add with cold milk sufficient to make a dough stiff enough to roll out. Make the cakes about half an inch thick and bake on pie tins in a quick oven. When done, cut around the edges and split them, place a thick layer of well sugared strawberries between, sift powdered sugar over the top and serve with cream. The foregoing is a recipe given in The Ladies' Home Journal.

To Wash Chamois Leather.

After being subjected to the ordinary treatment, wash leather usually belies its name, and instead of retaining its oftness and smoothness, dries literally as hard as a board. To preserve the leather in its original softness, wash it in the following manner: To every quart of hot (not warm) water add a teaspoonful of salad oil; wash the leather well through this, using plain primrose soap on the dirty partions; if necessary, rinse in a second supply of hot water and oil; wring, shake out and place fear, but not close to, a fire to dry. It is only when the leather is very dirty that the second water is required.

In W. O. Smith's Office, 318 Fort Street.

PURIFINE

Is the disinfectant that the world is talking about. In the United States, its merits are becoming known. The people are using it. Purifine possesses many points in its favor over other preparations. It is odorless, and in employing it as a disinfecting agent, does not create another odor as offensive as that which it subdues. Nonpoisonous too. That's an advantage children will meddle; servants misunderstand; then there's trouble. Some one is poisoned.

Those who use it speak its praise In convincing language, liere's one from the Department of Medicine in the University of Michigan,

"We use Purifine and find it very good for deederiging sinks and boxes, etc., and for washing spenges used about subjects for dissec-tion. W. A. CAMPBELL, Demonstrator of Anatomy."

PURIFINE is for sale by the HOLLISTER DRUG Co. in 25c., 50c., 75c. and 31.50 bottles. The "AUTOMATIC
